People and Partnerships

Great relationships are important, whatever the project or event. From your initial contact with our Business Development team, you will be allocated an experienced Project Manager whose job is to ensure excellent communication and service across the board.

Our reputation is built not just on the performance of our people, but on how we work with you. Collaboration and a 'can do' attitude count for a lot.

Service

Our fully-equipped and experienced production team is prepared to tackle projects of any size, from the smallest show to the most lavish stage extravaganza. We work with you at every stage, from the initial consultation to opening night and beyond, to make sure the production is beautiful, functional, and safe.

Fabrication

It's not just about the visual. Whilst we create amazingly accurate reproductions that really look the part, we also ensure our scenic items perform.

Whether you need us to create a whole event or to collaborate with others, our attention to detail extends beyond the visual.

Automation & Control

One System. Moving people, equipment, scenery, and staging.

Safe. Quiet. Reliable.

Global Scenic has partnered with Silicon Theatre Scenery, one of the World's Market Leaders in the field of automation, staging and engineering for the live entertainment industry. The enhanced capacity of the groups provides the ability to offer unrivaled technology and expertise.

Diversity

Our traditional theatre skills are regularly applied to a diverse range of projects. Readily transferrable, these skills sit at the core of our company and have helped us become a world-renowned business with a reputation for delivering extraordinary projects.

Portfolio

One look at our Projects portfolio and you'll see that we undertake all kinds of work, of all manner of scope and size – and in all sorts of locations.

From an event requiring 700 steeldeck platforms, to a 16' tall Olympic Torch on a pier in New York. From a Coachella Music Festival brand activation to a complete brand environment.

Production & Technical Services

From a design brief and the very first series of producer & production meetings, we can provide consultancy for cost planning and technical specifications, including proof of concept for significant scenic elements. R&D and innovation is in our nature and we have the facilities and people to test your ideas. Installation services, labor, logistics.

Room to Experiment

R&D is inherent in virtually every project we deliver. Finding ways to realise the visions of our creative clients draws heavily on ingenuity as well as determination, no matter the constraints

Innovation requires space and we're lucky to have plenty. Test builds, test rigs and trials allow both us and our clients to learn. This learning enables us to make the kind of choices that deliver the best of results.
